

ADITYA SINGH

Bengaluru, KN · +91 8707297557 · adityasinghtech011@gmail.com · Portfolio · LinkedIn · GitHub · Twitter

SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, C++

Frameworks & Libraries: React.js (Redux, Zustand), Next.js, Node.js, Express.js, React Flow, React DnD, TailwindCSS, ShadCN, AntDesign, StyledComponents, Bootstrap, CSR, SSR, a11y

Testing & Tooling: Jest, React Testing Library, Storybook, Git, Figma, CI/CD, Agile/Scrum

Databases: MongoDB, SQL

AI-assisted Dev: Cursor, Claude, ChatGPT, Devin

EXPERIENCE

Atomicwork (Series A) · Bengaluru, KA

Frontend Engineer

Dec 2024 – Present

- Built and scaled a **shared component system** used across multiple repositories, enabling faster and consistent UI development
- Owned the frontend architecture of a **workflow automation system**, implementing features like failure handling, conditional execution, and action pipelines
- Refactored state management from **single-store to multi-store architecture** using **Zustand**, improving scalability, performance optimisation and isolating complex UI state
- Developed **data-intensive UI systems (AG Grid)** with advanced filtering, bulk actions, and dynamic configurations for large datasets
- Resolved **race conditions** in UI interactions using mutex-based locking, ensuring reliability under rapid user actions
- Built **AI-assisted UX** features to auto-generate workflow descriptions, improving usability and reducing manual effort
- Reviewed **400+ PRs** across frontend and backend repositories, improving code quality and team velocity

Software Engineer Intern | MYSA (Pre-seed Fintech) · Bengaluru, KA

Apr 2024 – Sep 2024

Finance Dashboard

- Built key features for a **real-time finance management dashboard** using Next.js, React, TypeScript, and Tailwind; integrated RESTful APIs for live financial data and collaborated with design and backend teams.
- **Streamlined state management** using Context API; shipped core features iteratively in a fast-paced early-stage environment with regular design and backend syncs.

User Onboarding Platform

- **Led end-to-end development** of a new user **onboarding flow** using Next.js, TypeScript, and pdf-lib, automating document generation and data capture from scratch.

Freelance Web Developer | Client — GoMedicos · Lucknow, UP

Oct 2022 – Nov 2022

- Built a Study Abroad Consultancy website using HTML, CSS, JavaScript, Bootstrap, and MailChimp; optimised on-page SEO resulting in a 40% increase in organic traffic.

PROJECTS

FlowAI — Drag-and-Drop AI Workflow Builder · React, React DnD, TypeScript, React Flow, OpenAI

- Visual AI workflow builder with a DAG execution model, schema-driven node configuration, topological-sort runtime, pre-run validation, and LLM orchestration pipelines featuring branching logic and external API integrations.

Trackly — Task Management System · Next.js, React, TypeScript, TailwindCSS, Chart.js

- Built a task management system using Next.js, React, with **Grid.js** and **Recharts** for tabular data handling and visuals.
- Designed interactive UI flows with keyboard navigation, member-based grouping, and state-driven updates.

Vibe Club — Event Management Platform · Next.js, React, TypeScript, MongoDB, Node.js, TailwindCSS

- Full-stack event platform with Clerk authentication, event creation/management, webhook handling, and end-to-end TypeScript coverage.

EDUCATION

B.Tech — Computer Science & Engineering

Nov 2020 – June 2024

Babu Banarasi Das Engineering College, Lucknow, UP

ACHIEVEMENTS

- Organised and mentored a state-level hackathon with 150+ participants.
- Chairperson, GeeksforGeeks Student Chapter BBDEC · Ex-Technical Lead, Google Developer Student Club BBDEC.
